

Brief Overview

Our global toll-free numbers provides call centers like yours with toll-free numbers around the world, making it easy for your customers to reach you no matter where you are.

Key Features

- Country-specific international toll-free numbers
- More than 90 countries to choose from
- Easy set up and maintenance
- One place for your telecom and software needs

inContact Global Toll-Free Services

Let Your Customers Reach You No Matter Where You Are in the World

We know you don't just do business in the U.S. but have needs to service customers and take calls from countries around the world. The inContact Global Toll Free Services product provides you with country specific toll-free numbers in over 90 countries. This enables customers around the world to conveniently contact you, providing them with a better customer service experience.

The inContact products are as unique as the telecom options we provide. Our offering erases borders and distances so you can provide a truly global service experience. We can complete calls regardless of where they originate and where your center is located to service these calls. With inContact Global Toll-Free Service you can have callers on one end of the world dial a toll-free number and reach an agent with the answers on the other side of the world. The call is handled by inContact like any other dialed toll-free number.

- Increased international presence to better serve your market
- Easier to reach by customers located around the world
- inContact customers can manage both their national toll-free traffic, local-originated inbound traffic, and their international toll-free and local traffic through one call handling system
- Out-of-country companies that do not have a local presence in the specific calling country, but wish to present a local toll-free telephone number in one or more markets, can now manage all calls through one common call handling system
